# PRO SERIES

The PRO SERIES is developed according to  
the highest quality standards in  
manufacturing

**Brilliant  
Reliable  
Simplicity**

**Multiple configurations can be used for various installations, large and small.**

### **Ultra-Bright.**

With 7,000+ Nits (SMD) and 10,000 + Nits (DIP) brightness, the screen is clearly visible, even under direct sunlight.

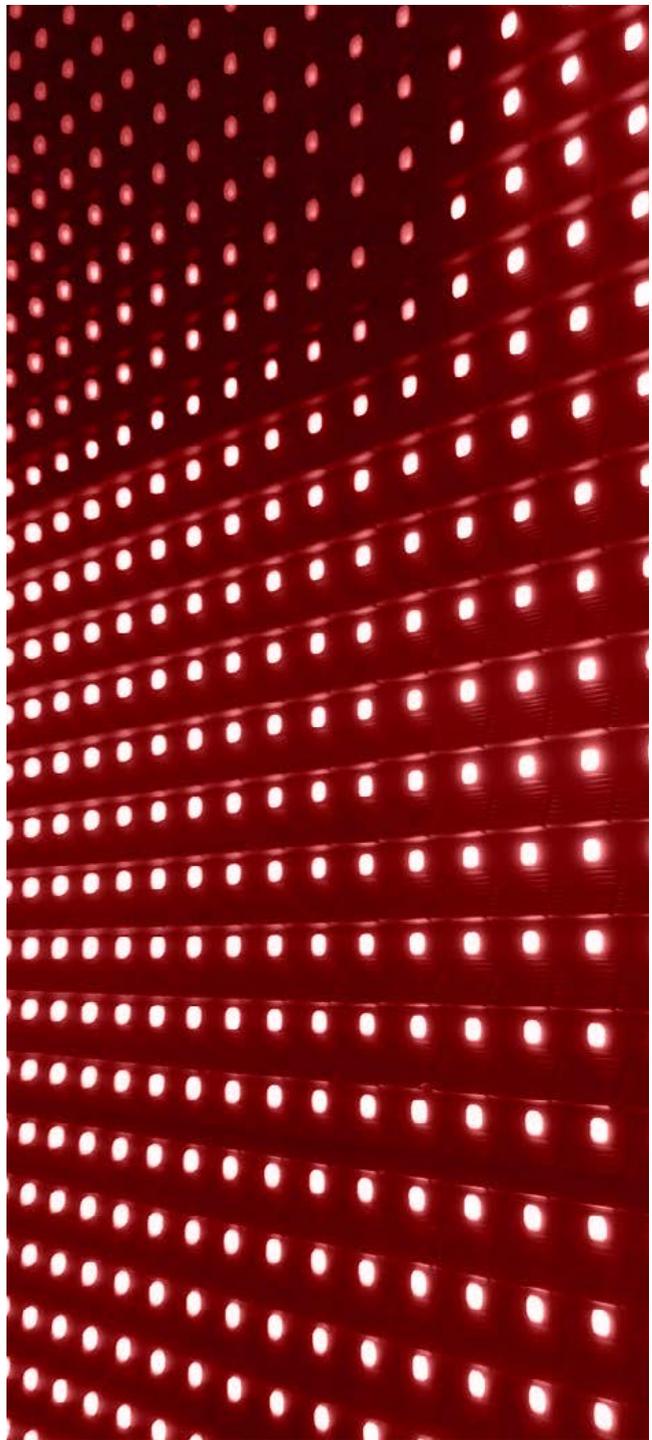

### **Vibrant.**

Tight pixel pitch starting with 6.67mm, 281 trillion colors and 3,840 Hz refresh rate, deliver bright, vibrant colors producing clear, vivid images and videos.

### **Reachable.**

Wide viewing angle of 160° horizontal and 120° vertical ensures your branding & advertising information reach the target audience at any distance.

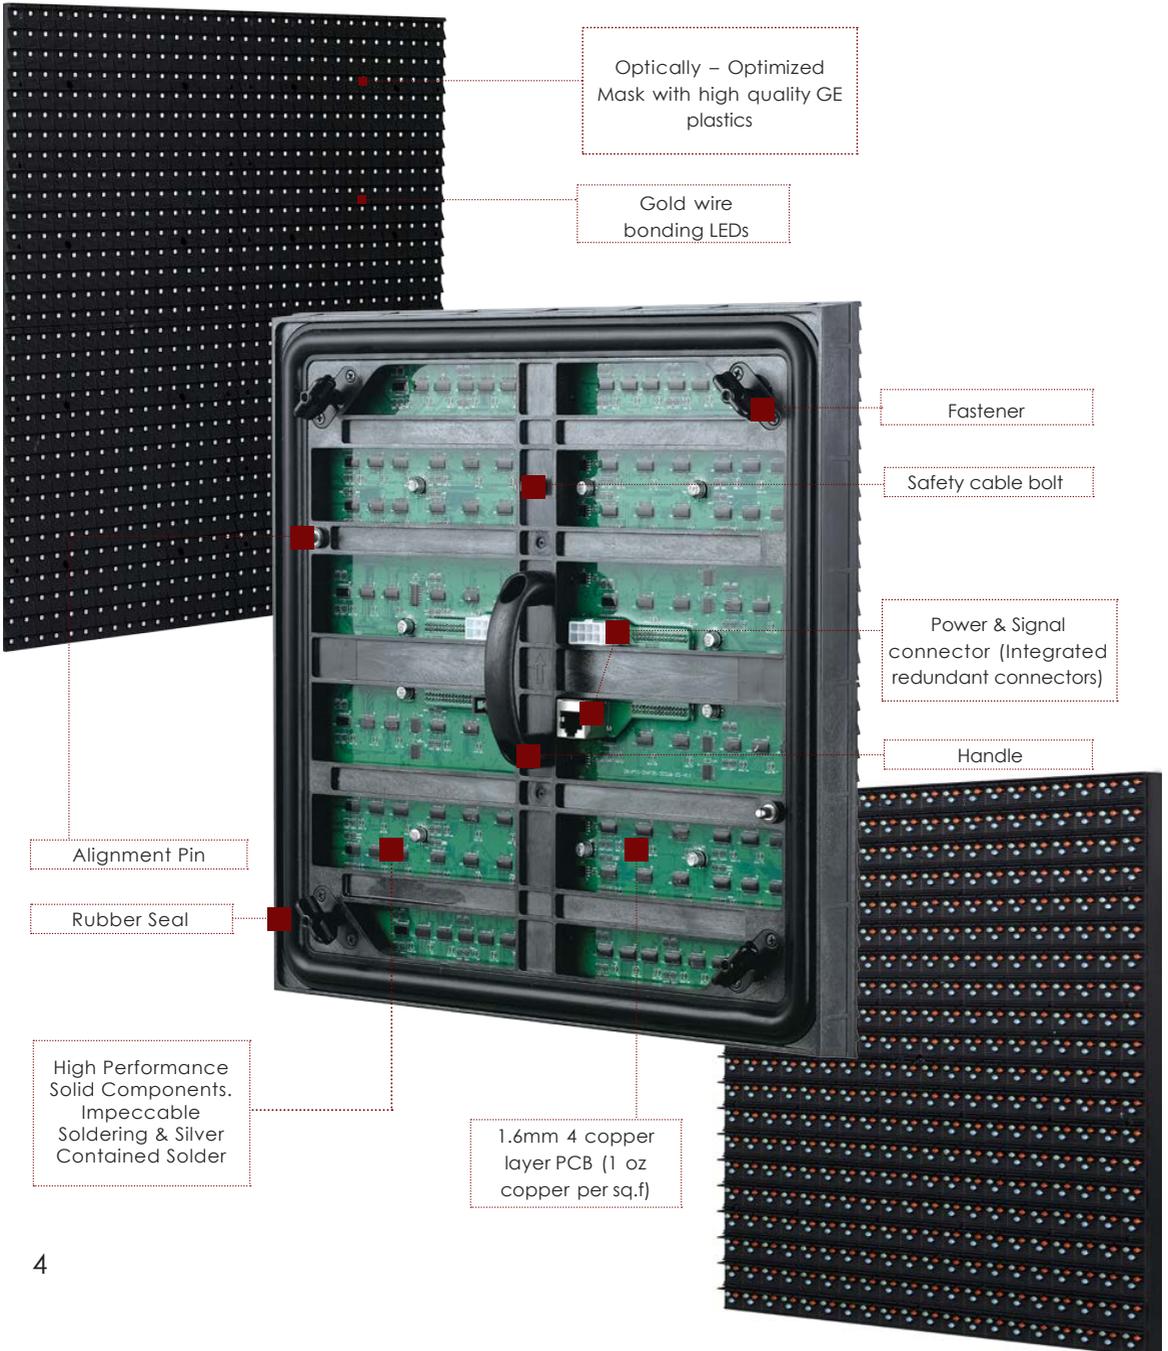

# Simply Best Quality

# Performance

The LED modules of the Pro Series are engineered by a stringent R&D process in design architecture, and material selection using state of the art manufacturing equipment. All combined with an effective quality control process to deliver peak performance with the utmost in reliability.

*\*Silicone Gel sealed on both sides: Prevents oxidation of components and solder joints etc.*

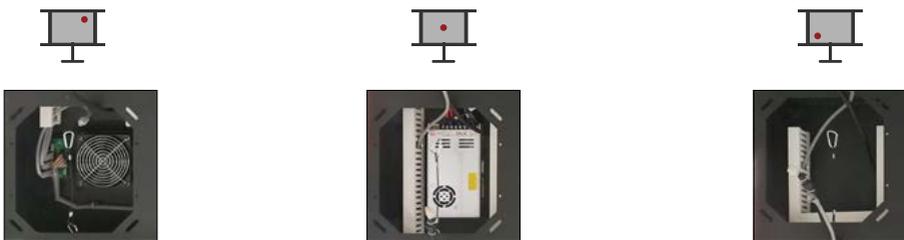

# Reliable

The Aluminum cabinet of the Pro Series is IP65 rated, ensuring the product is electrically functional and stable in all climates, including harsh weather conditions and extreme temperatures. The effective heat dissipation of the Pro Series design ensures long lasting, and dependable performance.

## Sectional In-Row Cabinet Architecture

### Receiving Card & Cooling Fans Section

Thermostatic control will enable and cycle fans at 100°F

### DC Power Source Section

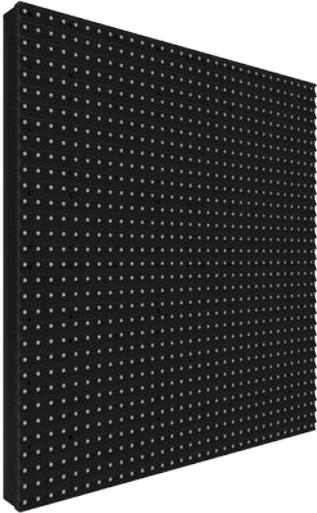

Power supplies efficiency  $\geq 90\%$ ; Fan-less type units are optional for excessively humid environments.

### Wiring Section

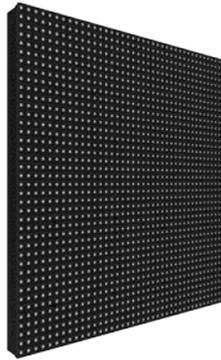

Power entry; Inner wiring between cabinets, antenna, and temperature sensor exit points (if applicable)

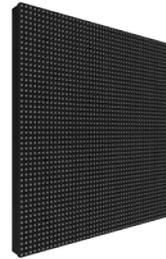

## MODULE OPTIONS

**SMD 10mm**

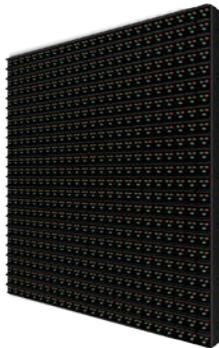

**SMD 8mm**

**SMD 6.67mm**

**DIP 16mm**

**DIP 13.3mm**

**DIP 10mm**

**All Models Share The Same Plastic Housing - Retrofit & Upgrade Your Signs In Future With Less Time, Less Cost.**

► Precise Low Knee Voltage Tech Adopted

# Simplicity

The internal components of the display can be accessed easily from the front, with a 1/4 turn of 4 spring loaded hex fasteners located at the corners of each module. It will take only 20 seconds to disassemble and remove one module.

**Safety cable is attached between the module and cabinet to prevent damage from falling during service.**

- ▶ Signal transmission to each individual module is separate, improving screen's visual performance and simplifying the troubleshooting process.

# FCC INTERFERENCE STATEMENT

## Federal Communications Commission Interference Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

# MULTI-SPORT VIRTUAL SCORE BOARDS

## CAN BE USED FOR

Football  
Baseball/Softball  
Basketball  
Tennis  
Volleyball  
And others

## We also offer tournament management (With use of Ultra Event)\*

### **Event Scheduling**

Events data management, scheduling settings, field settings and event item settings.  
Group the athletes and arrange the schedule automatically.

### **Result Management**

Generate the ranking for all athletes automatically with simply input results.  
Register the athletes automatically according to their rank.

### **Information Bulletin**

Bulletin the information of athletes, event result and ranking automatically.  
All information can be searched and printed Online.

### **Also offer Sports Stats System Professional Sports stats and report**

Controlling computer can be tied to existing sporting stadium, no need for external buzzers or horns. Advertisements can be made digital, save costs by not having to print banners for sponsors

# VIDEO ARBITRATION SYSTEM\*

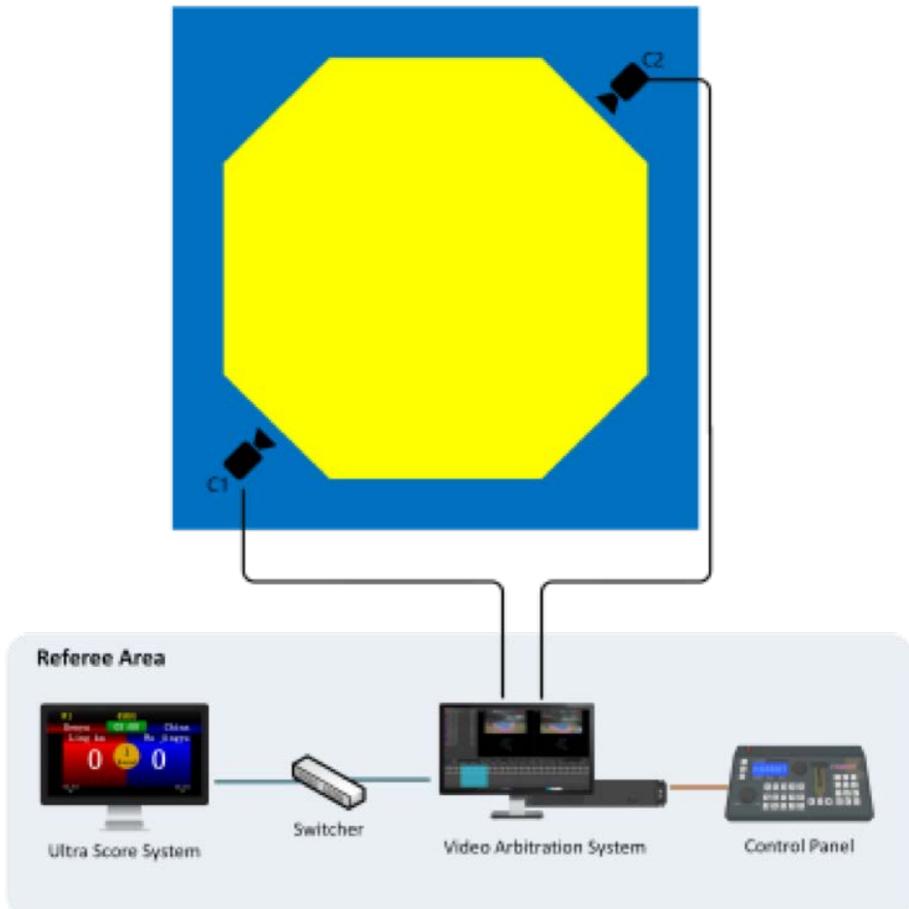

\* Signifies add-on feature (not included)

## Record and playback video during match

The Video Arbitration System (as known as Video Judgement System, Video Assistant Referee (VAR), or Instant Replay System), can record high definition (HD) videos during the match, and play them back in slow-motion. It can also be used to arbitrate the dispute during the match.

# Multi-Angle Video Record\*

4 channels synchronize video record. Track back or slow-motion playback each channel even during the recording.

## Specification

Channels: 2-8

Resolution: 1080p

Storage: 10+ Hours

Replay in Slow-motion

# LIVE VIDEO SYSTEM\*

Real-time score display and replay of the best moments

- Overlapping display of scores
- Overlapping display of player information
- Replay of high-definition slow motions
- Overlapping display with sports messages
